Philosophy

Why do we practice? For the love of design challenges; for an abiding interest in construction; for the satisfaction of creating art through our technology; and for the enjoyment of working with interesting people and community organizations.

Infinity Construction Company

It is difficult to find all experts on one platform; any initiated project depends on stretched logistic networks in Pakistan. The project coordination becomes so difficult that it results in a delayed completion. You very well know that delayed project means more sunk costs. This factor does not only increase the capital costs but also demoralize the workers and entrepreneurs. The first key success factor of any project is to make it cost Effective not only in protection but fixed assets as well.

It is an honor to introduce our company to your prestigious organization as a Consortium, which provides all engineering related facilities at one platform, our long stretched history and fully satisfied customers have encouraged us to initiate a platform, which caters all of your engineering needs and demands. We commit to serve all of your Industrial engineering needs and demands;

"No Job is Too Small for Us & No Project is Too Large for Us "

Infinity Construction Company

combines the talents of its principals in a unique background of history and knowledge of technical systems. As we collaborate with our clients, we synthesize our years of education, practice, and creativity with our clients' originality, budget, and interest. It's our task to find modern and practical solutions for the most unique design problems.

As our working relationships depend on trust and open communication, we look forward to developing longstanding relationships with our clients and consultants. We're known for our commitment and our meticulous attention to detail. We add value to every project we undertake by designing versatile spaces, by using sound building systems and materials, and by following through at every stage of the design construction process.

A message from CEO

Infinity Construction company values integrity; our practices are honest; our conduct is legal and ethical. Although we are motivated by a fair return on our investment, we are always striving for win-win partnerships with customers who share our desire to design and build memorial structures that add value to the communities in which they are built and assist cemetery owners in keeping the promise of prosperity that they have made to their lot holders. we are committed to effectively communicating to our customers the benefits of the infinity Construction company design/build process, and poured-in-place construction methodology.

We will ensure that our customers receive real and measurable value

History

Established in 1997 is led by a professional team having experience exceeding 25 years in fabrication and construction works.

To satisfy our customers, we are continually up-grading our machinery and other equipment corresponding to the said fields with high efficiencies.

Based in Lahore, **Infinity Construction Company** solves all the problems regarding Architectural, structural, fabrication, erection, construction and renovation and interior design.

In the past years, the fabrication sector in the country has been tougher, thus resulting in a positive environment for the competition. The company has introduced various technological innovations in the last few years in the field of fabrication engineering to be followed to increase the production rate and to give quality of work as well

Specializations

We are highly skilled & experience in construction of :

- Multistory Buildings
- Construction of houses
- Over Head Water Tanks
- Housing Schemes,
- Infrastructure work
- Power Plants
- Cold Storages
- Ware Houses
- Boundary Walls
- Marriage halls and marques
- Cinema
- Theatres
- Factories
- Civil works of Data center
- Education sector universities, school, colleges
- Road Works
- Laying Of Sewerage & Drain Pipelines
- Telecommunication sector

DATA CENTRE, The University of Lahore

we are providing complete civil & road solution with hi-tech technology and machinery and our site working team is highly capable to satisfy our respectable clients.

Mission Statement

Infinity Construction company values integrity; our practices are honest; our conduct is legal and ethical. Although we are motivated by a fair return on our investment, we are always striving for win-win partnerships with customers who share our desire to design and build memorial structures that add value to the communities in which they are built and assist cemetery owners in keeping the promise of perpetuity that they have made to their lot holders.

To this end, we are committed to effectively communicating to our customers the benefits of the infinity Construction company design/build process, and poured-in-place construction methodology. We will ensure that our customers receive real and measurable value from our **25-plus years** of experience working with Private & Government Sectors from around the Pakistan especially in the Punjab and capital territory.

Our employees are our most important resource in achieving our mission. At Infinity Construction, we focus on recruiting, developing and retaining employees with the skills and competencies required to maintain a dynamic corporate culture driven by the values of quality, innovation and safety. We then provide our people with the most effective tools and technologies required to further ensure our customers are completely satisfied with every stage of their working partnership with Infinity Construction company.

We hope and believe that this path will lead to excellence, to innovation, to adventure, and to the kind of uncertain, gutsy leadership that will allow both our employees and our clients to realize their aspirations at least - and maybe a lot more

Civil Services

Infinity construction company provides services to owners of new projects and existing buildings, to construction management firms, to engineering firms and to other architects requiring specialist consultation. The office has 25 years experience, talents and capability to provide services in the following areas

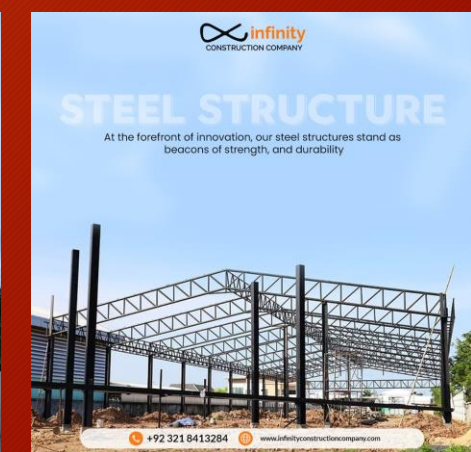

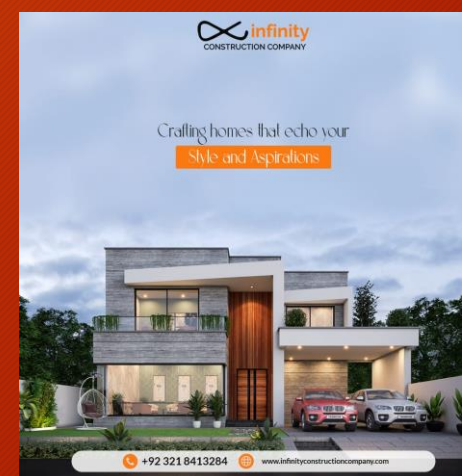

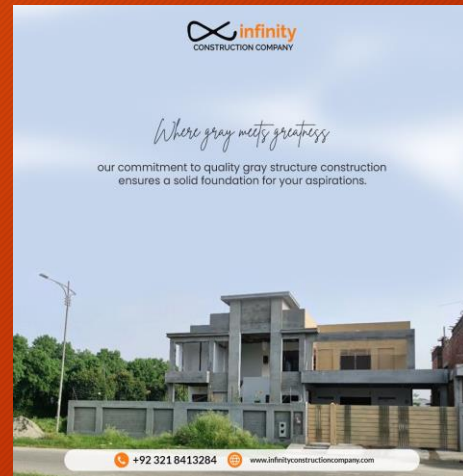

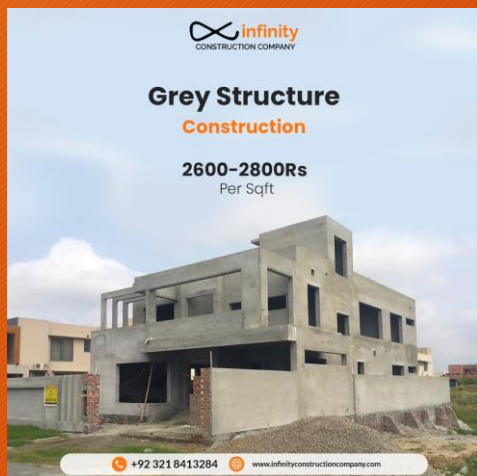

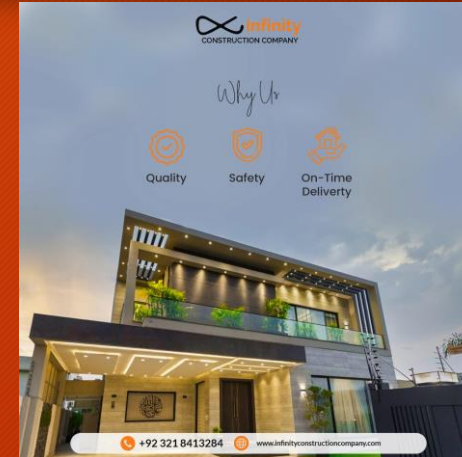

Normal Full Services Include:

- Site Analysis

Few of Company Projects

Quality Policy

With a history stretch of 25 years, we still do not claim to be one of the leading Electrical & Mechanical contractors in a field, We still have a long way to go on the prosperity road. Since last 10 Years. We have three key factors in mind, Which are,

Reliability

Uniformity

Value

Customer satisfaction sovereignty

State of Art Designs

Best Workmanship

Best Service

Free one year consultancy

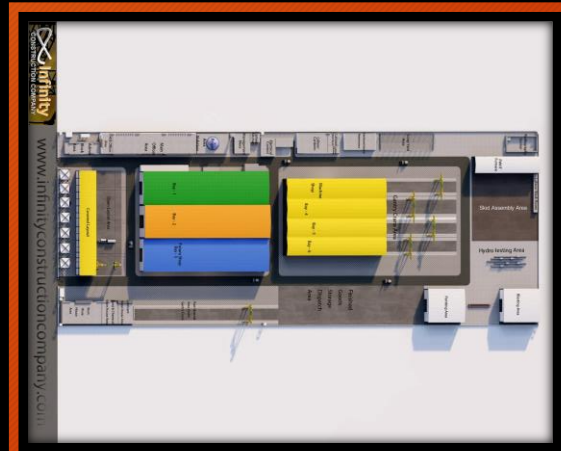

We Do Not Compromise On Quality Of Workmanship

To The Entire Satisfaction Of the Customer, We Provide Cost Effective Quality Construction, Fabrication And Installation On Turn Key Bases

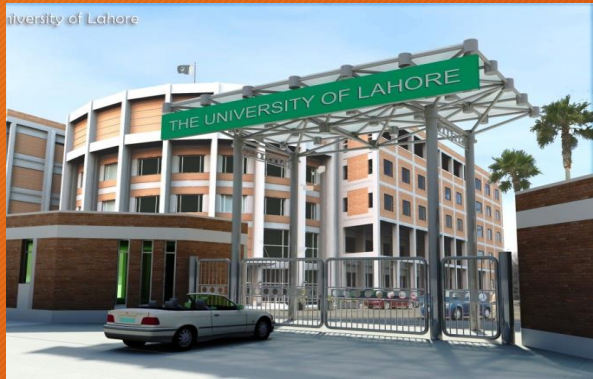

Our Engineers Continuously Work On Quality Improvement In Our Products And Services Through Research Development

We also provide free consultancy services. In fact our customers are our Assets
